

PRE CALVING PELLET

PRODUCT DESCRIPTION:

WSF Pre Calving Pellets are a high energy grain pellet with Anionic Salts designed to prevent metabolic issues during the busy calving period. They contain ingredients to help get the cow off to a great start by helping minimize disease & stimulate the Rumen. They also have quality protein from Soya Bean Meal to help improve volume and quality to colostrum. **WSF Pre Calving Pellets** contain a full range of organic trace minerals including Zinc, Copper, Cobalt, Selenium, Iodine to support immunity and health during the transition period. No additional Magnesium is required when feeding these pellets. Contains Yea-Sacc a live yeast to enhance feed efficiency and improve rumen function and feed conversion. These Pellets now contain Actigen® for overall gut health and colostrum quality, Mycosorb® mycotoxin binder.

FEEDING RECOMMENDATIONS:

- Product is a 9mm pellet designed to be fed at 2kgs per cow/day ideally starting to 14-21 days **PRIOR** to calving.
- Do not exceed recommended feeding rates
- Do not feed this product to lactating animals

STORAGE AND HANDLING :

Like all feedstuffs, Pre Calving Pellet should be stored dry, in bulk bins or placed on cement slabs, away from vermin and covered and protected from the weather accordingly. These are available in 25Kg bags or in bulk.
