SHEEP NUTS

PRODUCT DESCRIPTION

Sheep Nuts are formulated from grains and wheat products to give an economic feed that will keep your stock in optimum condition in times of poor feed availability.

Sheep Nuts provide an ideal way to supplement feed without the wastage of grains and to ensure the correct balance of vitamins and minerals. They can also be used to flush ewes prior to mating to help improve lambing %. By feeding prior to lambing we can help ewes produce good volumes of milk.

FEEDING RECCOMENDATIONS:

Feed 60 to 120 grams per day (Two 25Kg bags too 500 sheep) depending on other feed available. Start slowly, say 30 to 60 grams for the first week. Train ewes to nut feeding well before lambing. Ensure equal access to each sheep

INGREDIENTS SELECTED FROM:

Barley, Wheat, Molasses, Lime, Salt and a specialised vitamin & mineral mix.

AVAILABLE IN 25 KG BAGS, BULK BAGS AND BULK DELIVERY.

TYPICAL ANALYSIS: (approx.)

ME	12	MJME/kg DM
Crude Protein	13%	Minimum
Fibre	5.28%	Maximum
