

SUPREME DEER NUTS

PRODUCT DESCRIPTION:

WSF Deer Nuts are a high density diet to help assist hinds and stags achieve target live weights. Improving condition will help stock to reach their genetic potential for either velvet production or weight gain.

WSF Deer Nuts provide an ideal way to supplement feed without the wastage of grains and to ensure the correct balance of vitamins and minerals. They can be kept up to 4 months without deterioration.

FEEDING RECOMMENDATIONS:

Introduce feed slowly to avoid risks of digestive upset. Build up to required feed intake level over 1-2 weeks eg start at 250g per day and increase 500-750g per day. Intake may increase to 1-2kg per day for mature stock when pasture availability is poor.

Ensure sufficient fibre intake by providing access to hay. Ensure fresh water is available at all times.

INGREDIANTS SELECTED FROM:

Barley, Wheat, Soybean Meal, Molasses, Di-Calcium Phosphate, Lime, Salt, Sodium Bentonite and a vitamin and mineral premix.

TYPICAL ANALYSIS: (approx.)
